

# Matthew W. Carey

Experienced UI/UX Designer and Frontend Developer. Known for creative problem solving with limited resources and team development through my broad expertise and approachability. Passionate about making products and companies successful through user-centered design and development.

## EXPERIENCE

### Programmer Analyst – UI/UX Designer & Scrum Master

*Intrado – Denver, CO + Remote (2019 – 2021)*

- Wireframe, prototype, and liaise with development teams to bring new features and enhancements to market for a UCaaS product.
- Identify requirements for proposed programs and program enhancements in order to create design specifications, accurately develop, test, and implement codes based on the requirements and specifications while adhering to established deadlines, policies, and procedures.
- Collaborate with departments such as marketing, product management, project management, sales, engineering, and event services to gather job requirements and deliver exceptional results to our customers.
- Facilitate and participate in Agile ceremonies such as Daily Stand-Up, Scrum of Scrums, Iteration and System Demos, and Program Increment Planning. Work closely with a diverse team and product owner to predictably bring value to the business.
- Continuation of Programmer Analyst – Frontend Developer duties.

### Programmer Analyst – Frontend Developer

*West Unified Communications – Denver, CO + Remote (2010 – 2019)*

- Work as part of a team to create and maintain 600+ resource websites, event registration sites, survey pages, and web forms for both a large global customer base of Fortune 500 companies as well as internal audiences.
- Analyze web code for browser/platform issues and construct solutions.
- Administer content and code for dozens of data-driven emails for North American customers while serving as a resource for colleagues in Europe and Asia.
- Increase efficiencies and customer satisfaction by automating manual tasks and improving processes/workflows.
- Continuation of Programmer Analyst – Multimedia Specialist duties.

### Programmer Analyst – Multimedia Specialist

*InterCall – Denver, CO (2007 – 2010)*

- Brand account management portals, streaming media players, and HTML / RTF / Text emails.
- Capture, encode, and edit audio/video clips for streaming delivery or archival purposes with less than 24-hour turnaround time.
- Actively prioritize workload based on urgency, Service Level Agreements, and deadlines while communicating project status via CRM ticketing solutions such as Salesforce and ServiceNow.
